STRUVITE is a complete pet food for dogs with urine acidification properties, integrated with prebiotics (XOS and MOS) and antioxidant polyphenols extracted from <i>Vitis vinifera</i> . The diet has a reduced magnesium and potassium content to avoid the formation of struvite crystals. It is formulated with a reduced content of high-quality crude protein, in order to reduce the incidence of bacterial infections in the urinary tract. Finally, the inclusion of salmon oil completes the recipe, ensuring the intake of omega-3 fatty acids.		
The production process is carried out according to the procedures of the Quality Management System, controlled by applying the HACCP method. It involves the use of category 3 by-products, ground, mixed with thickeners, vegetable gelling agents and supplements. The product is then canned. Cans are hermetically sealed, labeled, packed, and stocked in our warehouse.
