HEPATIC is a balanced food for the supply of vitamins and minerals, integrated with prebiotics (XOS and MOS) that help intestinal function. The diet has been formulated with a reduced copper and sodium content in order to avoid organ overload and also has a modest intake of quality crude protein, of animal and vegetable origin, to support and not tire the liver function. To complete the recipe, salmon oil was added, a natural source of valuable omega-3 fatty acids. The production process is carried out according to the procedures of the Quality Management System, controlled by applying the HACCP method.
