

PRODUCT NAME : Toi Moi Marseille Soap Scented Cat Litter
PRODUCT IDENTIFIER : Natural Sodium Bentonite Clay Cat Litter with Marseille Soap Scented

CHARACTERISTICS

NATURE : Mineral
APPEARANCE : Grey Bentonite granules, Blue Colored Granules, Marseille Soap Scent
GRANULAR SIZE : 0.5 – 2.5 mm
SHELF LIFE : 2 years

PACKAGING : Flat Bottom, 5 Liter, and 10 Liter

**TYPICAL PHYSICAL PROPERTIES**

PROPERTY	Method	Specification
Moisture	TSE K 77	%7-9
Apparent Density	TSE K 77	1.00 g/cm ³
Water Absorption	TS 12131	min. %300
pH	TS 10252	10.00-11.00
Dust Free Rate	TSE K 77	%99,8
Clump Quality	TSE K 77	
Clump resistance drop test (height 100cm)		Intact/unimpaired
Efficiency (10 ml Water)		30-35 g
Efficiency (20 ml Synthetic Cat Urine)		55-60 g

FEATURES and BENEFITS

Sodium bentonite is produced from natural minerals. It eliminates unwanted odors naturally. High dust-free rate. High liquid absorption. Forms fast and strong clumps and keeps the litter box dry and clean. Does not scatter, easy to clean. Does not stick to the paws. Provides economic consumption. Does not contain chemicals that can harm you and your cat's health.

RECOMMENDED USAGE

Always fill the litter box with a height of a minimum of 7 cm. Clean up the accumulated waste with a spade daily. Do not throw waste into the toilet. Use a trash bin. Fill the reduced cat litter up to a minimum of 7 cm. Store in a dry place protected from moisture and direct sunlight.

**SAFETY WARNINGS**

Pregnant women should avoid contact with cat feces. When disposing of dirty litter, act in accordance with local laws. Keep out of reach of children. Wash your hands after touching the product.
