ACABADOS Y
MANTENIMIENTO

Shintotex®
Advanced synthetic fibers

Es la fibra sintética para muebles de exterior inspirada en la naturaleza y perfeccionada técnicamente hasta alcanzar el máximo nivel de confort, funcionalidad y durabilidad. El Shintotex está compuesto por PP y PE más componentes catalizadores como filtros UV, pigmentos, aditivos anti-estáticos y elementos plastificantes.

Características técnicas
Resistencia a cambios climatológicos.
Resistencia a agentes químicos abrasivos.
Resistencia a rotura y deterioro por el uso.
Alta flexibilidad.
Total reciclaje.

Características estéticas
Calidez y apariencia natural.
Tacto agradable.
Variedad de texturas y trenzados.
Fácil limpieza.
Mayor ligereza.

Limpieza y mantenimiento
Pasar cepillo de cerdas suaves sobre el tejido para eliminar el polvo o utilizar solución jabonosa de PH neutro para la limpieza de residuos o manchas. Evitar el contacto con productos abrasivos (lejías, cloro, aceites, productos con ácidos o sustancias corrosivas en su composición).

This is a synthetic fiber for outdoor furniture, inspired by nature and perfected by technology to achieve maximum comfort, functionality and durability. Shintotex is made of PP and PE, as well as catalysts, such as UV filters, pigments, additives, anti-static agents and plasticisers.

Technical features
Resistant to changing weather conditions.
Resistant to abrasive chemical agents.
Resistant to breakage and to wear and tear.
Highly flexible.
Fully recyclable.

Aesthetic features
Warm, natural appearance.
Pleasant to the touch.
Variety of textures and braids.
Easy to clean.
Lighter weight.

Maintenance and cleaning
Use a soft-bristled brush to remove any dust from the weave. Also, a soapy solution of neutral PH can be used to clean any residue or marks. Avoid contact with abrasive products (bleach, chlorine, oils, products containing corrosive acids or substances).

Summer Collection

Tanto el ánima como el recubrimiento del cordón es de polipropileno para conseguir una mayor solidez a la luz e intemperie. Además, lleva un filtro de color para mayor fijación.

Limpieza y mantenimiento

Utilizar solución jabonosa de pH neutro para la limpieza de residuos o manchas. Evitar el contacto con productos abrasivos (lejías, cloro, aceites, productos con ácidos o sustancias corrosivas en su composición).

Both the rope itself and its coating are made from polypropylene to ensure greater resistance to light and weather. It also includes a colour filter for greater fixing.

Maintenance and cleaning

A soapy solution with a neutral pH can be used to clean any dirt or marks. Avoid contact with abrasive products (bleach, chlorine, oils, products containing acids or corrosive substances).

POINT

**Aluminio
pintado en polvo**
**Powder coated
aluminum**

Se aplica un recubrimiento en polvo que proporciona una gran durabilidad y estabilidad del color en exteriores. Está compuesto por resinas de poliéster, pigmentos y aditivos, libre de TGIC.

Limpieza y mantenimiento
Utilizaremos bayetas suaves o esponjas que no rayen la superficie y agua con jabón o detergentes neutros diluidos en agua; nunca productos abrasivos. Después se enjuagará con agua limpia y se secará con un paño, para evitar que el detergente afecte al material.

A powder coating is applied to ensure durability and color stability for outdoors. It is composed of polyester resins, pigments and additives, free of TGIC.

Maintenance and cleaning
Use soft cloths or sponges that will not scratch the surface with soap and water or neutral detergents diluted in water; never use abrasive products. Then rinse with clean water and dry with a cloth to prevent the detergent from affecting the material.

Porcelánico
Porcelain

Se trata de un material porcelánico elaborado de 12 mm de espesor. Características técnicas: Impermeable y resistente a líquidos, con un nivel de absorción próximo a cero. Resistente al rayado y a la abrasión gracias a la dureza de su superficie. No se quema en contacto con el fuego ni emite humo ni sustancias tóxicas al ser sometido a altas temperaturas. Resistente a cualquier tipo de agente químico de limpieza. No desprende sustancias nocivas. Es totalmente apto para el contacto con los alimentos. Certificado NSF. Siendo 100% natural, los colores no se desvirtúan cuando el material se expone al sol o a condiciones meteorológicas extremas. No desprende ninguna sustancia nociva para el entorno. Hasta un 52% de material reciclado en cada tabla. 100% reciclable. 30 kg/m² en la tabla de 12 mm. Módulo de rotura elevado. Resistente a altas cargas de presión y peso.

Limpieza y mantenimiento

Tiene una limpieza fácil ya que no pueden penetrar en el material los restos de comida y residuos que se depositen por lo que garantizan una buena higiene. Para la mayoría de los casos, sólo bastará con un paño húmedo para limpiarlo. Use un paño de microfibra para quitar el polvo de la superficie. Se puede lavar con agua tibia, a la cual se le puede agregar un detergente en la dosis de uso recomendado por el fabricante. (Deben evitarse productos que contengan ácido fluorhídrico y sus derivados). Enjuagar con agua tibia y secar con bayetas o algo similar.

This is a 12-mm thick porcelain material. Technical characteristics: Waterproof and resistant to liquids, with an absorption level close to zero. Scratch and abrasion resistant thanks to the hardness of the surface. No combustion takes place in contact with fire and no smoke or toxic substances are released when it is subjected to high temperatures. Resistant to any type of chemical or cleaning agent. No dangerous substances are given off. It is totally apt for contact with foodstuffs. NSF certified. As it is 100% natural, the colours do not fade when exposed to sunlight or subjected to extreme weather conditions. No dangerous substances that may harm the environment are given off. Each board contains up to 52% recycled material. 100% recyclable. 30 kg/m2 in a 12 mm board. Highly resistant to breakage. Resistant to high pressures and loads.

Maintenance and cleaning

Easy to clean, as traces of food and other residues on the surface cannot penetrate the material, thus offering enhanced hygiene; in most cases, it is sufficient to wipe the surface clean with a damp cloth. Use a microfiber cloth to dust the surface. To wash, use lukewarm water; a detergent may be added according to the dosage recommended by the manufacturer (products containing hydrofluoric acid and its derivatives should be avoided). Rinse with lukewarm water and dry with a clean cloth.

Poliétileno
Polyethylene

Es el material utilizado sólo en la colección Weekend. Se presenta en planchas de polietileno de alta densidad fabricadas por extrusión de 2 cm de espesor. Con aditivos UV (protección solar) para que el color no sufra alteraciones. Tanto para los asientos como para tapas de mesas se utilizan planchas de cuatro colores diferentes: blanco, negro, taupe y gris.

Limpieza y mantenimiento

El mantenimiento de estos materiales es mínimo ya que no sufren deterioro con el paso del tiempo. Para limpiar basta con pasarle un paño húmedo o aplicar agua y jabón neutro. Para disimular rayas y defectos superficiales puedes utilizar espráis/ líquidos reparadores que se encuentran en el mercado.

This material is only used in the Weekend collection. The high-density polyethylene is manufactured under an extrusion process and is 2 cm thick. It has UV additives (for solar protection) to ensure that no discolouring takes place. The boards used for both the seats and the table tops are available in four different colours: white, black, taupe and grey.

Maintenance and cleaning

Maintenance of these materials is minimal, since they do not deteriorate over time. To clean them, just wipe with a damp cloth or apply water and a mild soap. To conceal scratches and surface defects, you can use repair sprays / liquids found on the market.

Blanco 90
White 90

Gris 92
Grey 92

Taupe 91

Black 93

Compacto
HPL

Es el material de las tapas de las mesas de algunas colecciones. Se trata de tablero compacto de 10 mm de espesor en calidad standard (CGS) termoendurecido a alta presión en formato 4200x1600 mm con el núcleo compuesto de resinas fenólicas y superficies decorativas impregnadas en resinas melamínicas.

Limpieza y mantenimiento

Las superficies de compacto deben limpiarse con regularidad pero no requieren ningún mantenimiento especial, solo un paño húmedo con agua templada o detergente suave. Se pueden usar perfectamente casi todos los productos de limpieza o desinfectantes domésticos siempre y cuando estos no sean abrasivos o altamente alcalinos.

This is the material used for the table tops of some collections. It is a 10-mm thick, compact board in standard quality (CGS), which was thermoset at high pressure in a 4200x1600 mm mould, with a core made of phenolic resins and decorative surfaces that are impregnated with melamine resins.

Maintenance and cleaning

Surfaces made out of HPL should be cleaned regularly and do not require any special maintenance; just wipe with a damp cloth that has been previously soaked in lukewarm water with a gentle detergent. Almost all kinds of cleaning products can be used without any problem, as long as they are not abrasive or highly alkaline.

Teca Natural
Natural Teak

Madera de teca natural de grado A
con certificado FSC® C188181

POINT utiliza madera teca de grado A de origen asiático, procedente de bosques sostenibles de talas controladas. La teca está clasificada como la madera más premium del planeta y, por lo tanto, la más adecuada para los muebles de exterior.

Es extremadamente duradera, estable, impermeable y resistente a la intemperie. Esto se debe a los altos niveles de aceites naturales, dando como resultado una mínima absorción de la humedad y una gran estabilidad. Además, esta madera es muy resistente a los hongos, así como a los ataques de parásitos e insectos.

La teca se dilata y contrae con los cambios climáticos. La contracción de la madera puede provocar grietas finas en las juntas de ensamblaje o en la propia veta de la madera. Esto no afecta a la integridad estructural del armazón.

En POINT no aplicamos ningún “acabado” a nuestra teca. Toda nuestra teca tiene un acabado natural sin ningún tratamiento.

Con el tiempo, los muebles de teca que están al sol, lluvia, humedad, etc. pueden volverse de un color gris. Esto es debido a un proceso de oxidación superficial que protege naturalmente la madera y hace que adquiera una coloración gris plata. Este proceso es estético y no daña la resistencia ni la calidad de la madera.

Dependiendo de las condiciones ambientales, la coloración grisácea natural o el desgaste causado por factores

Grade-A natural teak wood
with FSC® C188181 certified

POINT uses grade-A Asian teak wood sourced from carefully managed sustainable forests. Teak is considered the most premium wood on Earth and, therefore, the most suitable for outdoor furniture. It is extremely hard-wearing, stable, waterproof and weather-resistant. This is due to its high level of natural oils, resulting in minimal moisture absorption and great stability. This wood is also highly resistant to fungi and attacks by parasites and insects.

Teak expands and contracts with changes in climate. Shrinking of the wood can result in hairline cracks in the assembly joints or the grain of the wood itself. This does not affect the structural integrity of the frame’s construction

At POINT we do not apply any “finish” to our teak. All our teak is untreated and has a natural finish.

Over time, teak furniture that is exposed to sun, rain, humidity, etc. can turn a silver-grey colour. This is due to a process of surface oxidation that naturally protects the wood and gives it a grey hue. This process is merely aesthetic and does not affect the strength or quality of the wood.

Depending on the environmental conditions, this natural greying or weathering may be noticed after a few weeks. In drier climates, it will take several months for the teak to be affected.

Teca Natural
Natural Teak

climatológicos pueden notarse después de unas semanas. En climas más secos, la teca tardará varios meses en verse afectada. La aparición de aceite en la superficie de los muebles de teca es algo normal. Los aceites naturales presentes en la teca son los que la convierten en la mejor madera para muebles de exterior. De hecho, un alto contenido en aceite es un indicador de una madera de alta calidad. Sin estos aceites, la madera no sobreviviría a temperaturas y humedad extrema a la que normalmente están expuestos los muebles de exterior.

Los aceites y pigmentos dentro de la capa superficial de la teca comenzarán a lavarse gradualmente durante la exposición a las primeras lluvias. Este es un proceso natural y el aceite puede desprenderse durante los primeros 2 - 3 meses, según el entorno en el que se coloquen los muebles.

Evite colocar los muebles nuevos de teca en espacios exteriores con pavimentos de piedra porosa de color claro hasta que el proceso de expulsión de aceite haya disminuido. Del mismo modo, evite dejar cojines de colores claros sobre o cerca de los muebles de teca durante este proceso: los tejidos manchados con aceite de teca natural se pueden limpiar con agua y jabón neutro. La cantidad de aceite que sale de la teca durante los primeros meses será mayor y, por lo tanto, es más probable que cause manchas en las superficies y tejidos. Este es un proceso natural que no puede ser previsto.

Debido a que la teca es una madera naturalmente aceitosa, no es adecuado pintar ni barnizar. Cualquier pintura o barniz aplicada no se adherirá correctamente a la superficie y después de un tiempo comenzará a desprenderse. No recomendamos el uso de ningún aceite de madera en la teca. La teca ya es una madera naturalmente “aceitosa” y la adición de más aceite no agrega ninguna protección adicional. Si se incluye aceite de manera adicional, comenzará a crearse moho en las capas superficiales y la teca se volverá negra gradualmente; coloración que sólo puede eliminarse con un lijado agresivo.

The appearance of oil on the surface of teak furniture is normal. It is the natural oils in teak that make it the best wood for outdoor furniture. In fact, a high oil content is an indicator of high-quality wood. Without these oils, the wood would not survive the extreme temperatures and humidity to which outdoor furniture is normally exposed.

The oils and pigments in the surface layer of the teak will gradually begin to wash away the first few times it is exposed to rain. This is a perfectly natural process and it can secrete oil for the first 2 - 3 months, depending on where the furniture is placed.

Do not place new teak furniture on light coloured porous stone patio surfaces until the oil secretion process has decreased somewhat. Similarly, avoid leaving cushions covered with light coloured fabrics on or near teak furniture during this process: fabric stained with natural teak oil can be cleaned with neutral soap and water. The amount of oil that comes out of the teak will be greater during the first few months and, therefore, it is more likely to stain surfaces and fabrics. This is a natural process that cannot be foreseen.

Wasps can occasionally attack the teak surface to make their nests, usually in the spring and early summer. There is no way to prevent this from happening, other than by removing their nests and scaring the wasps away.

Because teak is a naturally oily wood, it should not be painted or varnished. Any paint or varnish applied will not adhere properly to the surface and will soon begin to peel. We do not recommend using any wood oil on teak. Teak is already a naturally “oily” wood and the addition of more oil does not confer any additional protection. If oil is added, mould will begin to build up in the surface layers and the teak will gradually turn black, which can only be removed by aggressive sanding.

Teka
Teak

Limpieza y mantenimiento

A pesar de ser un excelente material para los muebles de exterior, su tratamiento y mantenimiento son indispensables para conservar su belleza.

Si usted quiere mantener el color plateado natural, POINT recomienda el uso del TEAK CLEANER para limpiar y abrillantar la madera. Para mantener la teca con el mismo aspecto que tiene cuando está recién sacada de la caja, use primero el limpiador y abrillantador TEAK CLEANER para restaurar el color y aplique, posteriormente, el protector TEAK PROTECTOR EcoSafe para mantener y conservar el marrón dorado durante más tiempo. Este producto no es un aceite y está elaborado a base de agua, sin disolventes. Ninguno de estos dos productos afecta a la resistencia y longevidad de los muebles, únicamente a su apariencia.

Teak cleaner

- Modo de empleo:**
1. Antes de emplear el TEAK CLEANER, se debe utilizar una protección para los ojos y guantes de goma. Antes de empezar proteja la superficie en donde se va a trabajar.
 2. Primero mojar el mueble con agua.
 3. Agite el TEAK CLEANER antes de usar.
 4. Aplique el TEAK CLEANER con un paño suave o una esponja. Dejar penetrar durante 3 minutos.
 5. Cepille el mueble para limpiarlo con una almohadilla de fregar en dirección al veteado.
 6. Lave bien el mueble con agua.
 7. Para un color prolongado, deje secar el mueble y trátelo con TEAK PROTECTOR.

Maintenance and cleaning

Despite being an excellent material for outdoor furniture, its treatment and maintenance are essential to preserve its beauty.

If you want to keep the natural silver colour, POINT recommends using the TEAK CLEANER to clean and polish the wood. To keep the teak looking like it did when it was new, first use the TEAK CLEANER to clean and polish and to restore the colour, then apply EcoSafe TEAK PROTECTOR to maintain and preserve its golden brown colour for longer. This is not an oil; it is a water-based, solvent-free product. Neither of the two products affects the strength and longevity of the furniture, only its appearance.

Teak cleaner

- Directions for use:**
1. Before using the TEAK CLEANER, put on eye protection and rubber gloves. Before you start, protect the surface where you are going to work.
 2. First wet the furniture with water.
 3. Shake the TEAK CLEANER before use.
 4. Apply the TEAK CLEANER with a soft cloth or a sponge. Allow to penetrate for 3 minutes.
 5. Use a scouring pad to clean the furniture, brushing it in the direction of the wood's grain.
 6. Wash the furniture thoroughly with water.
 7. For long-lasting colour, let the furniture dry and treat it with the TEAK PROTECTOR.

Teak protector

- ¿Por qué es mucho mejor que el TEAK SELLADOR?**
1. Mantiene el color marrón dorado de la teca durante más tiempo:
 - Hasta 4 veces más que el aceite de teca.
 - Hasta el doble de largo que los selladores de teca.
 2. Es respetuoso con el medio ambiente porque es 100% con base de agua. Sin humos tóxicos. No es inflamable. EcoSafe.
 3. Es rápido y fácil de aplicar.
 4. No es un aceite, no es grasiento.
 5. Es resistente al moho y evita manchas negras en la teca.

- Instrucciones de uso:**
1. Antes de utilizar el TEAK PROTECTOR se debe utilizar protección en los ojos y guantes de goma. Cubra el suelo debajo de su área de trabajo antes de comenzar.
 2. La teca gris o la teca tratada con aceite de teca deben limpiarse primero con TEAK CLEANER.
 3. Teca nueva: limpie con TEAK CLEANER para eliminar algunos de los aceites naturales de la teca o también puede dejar a la intemperie durante 2 semanas en el exterior antes del tratamiento.
 4. Si la madera limpia está áspera, lijar ligeramente antes de tratar con TEAK PROTECTOR. Asegúrese de que la teca esté 100% seca y sin de polvo.
 5. Agitar y remover el TEAK PROTECTOR al menos un minuto antes de usar. Una agitación insuficiente puede provocar un desgaste desigual.
 6. Le sugerimos que pruebe el TEAK PROTECTOR en un área pequeña primero (por ejemplo, en la parte posterior de una pata del mueble) para juzgar si el color cumple con sus expectativas.
 7. Aplicar una capa muy fina de TEAK PROTECTOR uniformemente sobre el mueble con un paño sin polvo. Aplicar una segunda capa muy fina después de 30 minutos de secado.
 8. Se recomienda tratar sus muebles con TEAK PROTECTOR al menos una vez al año.

Teak protector

- Why is it so much better than TEAK OIL SEALER:**
1. It maintains the light-brown colour of teak for a longer time:
 - Up to 4 times longer than teak oil.
 - Up to twice as long as teak sealers.
 2. It is environment-friendly because it is 100% water-based; no toxic fumes; non flammable; EcoSafe.
 3. It is fast and easy to apply.
 4. It is not an oil, it is not greasy: clothes stay clean.
 5. It is resistant to mould and prevents black spots on the teak.

- Instructions for use:**
1. Before using the TEAK PROTECTOR, put on eye protection and rubber gloves. Before you start, protect the surface where you are going to work.
 2. Grey teak or teak treated with teak oil must first be cleaned with TEAK CLEANER.
 3. In the case of new teak, first clean it with our TEAK CLEANER to remove some of the natural teak oils (or weather for 2 weeks outside before treatment).
 4. If cleaned wood feels rough, sand it lightly before treating it with the Protector. Make sure the teak is completely dry and free from dust.
 5. Shake and stir the TEAK PROTECTOR for at least a minute before use. Insufficient shaking can lead to uneven weathering.
 6. We suggest you try the TEAK PROTECTOR on a small area first (e.g. the back of a leg) to ensure that the colour meets your expectations.
 7. Apply a very thin layer of TEAK PROTECTOR evenly over the furniture with a dust-free cloth. Apply a second very thin coat after leaving to dry for 30 minutes.
 8. We recommend that you treat your furniture with TEAK PROTECTOR at least once a year.

Teca Weathered
Weathered Teak

La sabiduría de la edad

POINT ofrece dos tipos de acabado en sus maderas de teca, uno sin tratamiento, totalmente natural en el que el material envejece adquiriendo una hermosa pátina gris. Y, otro –weathered– en el que la madera se somete a un proceso sostenible de envejecimiento, que consiste en erosionar la veta de la madera cepillándola repetidas veces totalmente a mano hasta conseguir una textura más rústica de la veta y se le aplica un tratado con base al agua ecológico que consigue este característico efecto envejecido que adquiere la teca a la intemperie.

Este tratamiento de madera envejecida, se va desprendiendo con la exposición a los elementos. Así, la teca natural va quedando expuesta y tomando la tonalidad gris característica. El ritmo de envejecimiento del acabado varía en función del clima, la exposición y la dedicación al cuidado y mantenimiento. El proceso de envejecimiento se puede acelerar, voluntariamente, con solo dejar los muebles sin tratar o sin cubrir.

The wisdom of age

POINT offers two types of finish on its teak woods. One is untreated and completely natural, where the material takes on a beautiful grey patina as it ages. The other is weathered, where the wood undergoes a sustainable ageing process that consists of eroding the grain of the wood by repeatedly brushing it by hand to give the grain a more rustic texture. Then an ecological water-based treatment is applied to achieve this characteristic weathered look that teak takes on when exposed to the elements.

This weathered wood treatment gradually fades with exposure to the elements, leaving the natural teak exposed so that it takes on the characteristic grey tone. The rate at which the finish ages varies according to climate, exposure, and care and maintenance. The ageing process can be accelerated voluntarily by simply leaving the furniture untreated or uncovered.

Teca Weathered / Weathered Teak

TechTeak
Innovative Outdoor Teak

TechTeak es un material innovador desarrollado por POINT para muebles de exterior y minuciosamente fabricado para reproducir el aspecto cálido y natural de la teca. Su característica principal es su capacidad para resistir las condiciones climáticas más adversas sin necesidad de mantenimiento, lo que lo convierte en el mejor aliado para proyectos que requieren piezas duraderas y de alta calidad. Está compuesto por una mezcla de polímeros de última generación, aditivos antiestáticos, plastificantes y elementos catalíticos esenciales como filtros UV y pigmentos. Además, es 100% reciclable al final de su ciclo de vida, reafirmando nuestro compromiso con la sostenibilidad.

Características técnicas

Resistente a condiciones meteorológicas extremas.
Altamente duradero.
Impermeable.
Totalmente reciclable.
Incorpora un 20% de material reciclado en su composición.

Características estéticas

Aspecto cálido y natural.
Su color y estética permanecen inalterables.
Agradable al tacto.
Fácil limpieza.

Limpieza y mantenimiento

Para limpiar cualquier suciedad o marca se puede utilizar una solución jabonosa con pH neutro y una esponja de lijado suave. Evitar el contacto con productos abrasivos (lejías, aceites, productos con ácidos o sustancias corrosivas en su composición).

TechTeak

TechTeak is an innovative material developed by POINT for outdoor furniture and meticulously crafted to replicate the warm, natural look of teak. Its exceptional feature is its ability to withstand the harshest weather conditions without requiring any maintenance, providing the best solution for projects that require durable, high-quality furniture. It consists of a blend of cutting-edge polymers, anti-static additives, plasticizers, and essential catalytic elements such as UV filters and pigments. In addition, it is 100% recyclable at the end of its life cycle, reaffirming our commitment to sustainability.

Technical features

Resistant to extreme weather conditions.
Highly durable.
Waterproof resistant.
Fully Recyclable.
It incorporates 20% recycled material in its composition.

Aesthetic features

Warm, natural appearance.
Its color and aesthetics remain unaltered.
Soft and smooth texture.
Easy to clean.

Maintenance and cleaning

A soapy solution with a neutral pH and a soft sanding sponge can be used to clean any dirt or mark. Avoid contact with abrasive products (bleach, oils, products with acids or corrosive substances in their composition).

Hormigón
Concrete

Se trata de una estudiada mezcla de hormigón de alta calidad reforzada y sellada con imprimación superficial de resina acrílica en base acuosa, libre de plastificantes y disolventes, para garantizar el máximo nivel de rendimiento, resistencia y durabilidad. Está fabricado con cemento ECO tipo II/A-LL 52,5 R, de resistencia elevada y producido con una reducción de emisiones directas de CO2 superior al 15%. Al final de su ciclo de vida es 100"% reciclable.

Características técnicas

Resistencia a cambios climatológicos adversos.
Gran durabilidad.
Estabilidad.
Resistencia a la abrasión.
Resistente al moho y las plagas de insectos.

Características estéticas

Textura mate.
Su color y estética permanecen inalterables.
Fácil limpieza.

Limpieza y mantenimiento

Puede utilizarse una solución jabonosa con pH neutro para eliminar cualquier mancha o marca. Evite productos químicos agresivos o cepillos abrasivos que puedan dañar el acabado. Utilice fundas protectoras durante periodos prolongados sin uso para proteger sus muebles de la intemperie.

Hormigón / Concrete

Shaped using a special blend of high-quality concrete reinforced and sealed with a surface primer of water-based acrylic resin, free of plasticizers and solvents, ensuring the highest level of performance, strength and durability. It is made with high-strength ECO cement type II/A-L 52.5 R, produced with a direct reduction of CO2 emissions of more than 15%. It is 100% recyclable at the end of its life cycle.

Technical features

Resistant to extreme weather conditions.
Highly durable.
Stability.
Resistant to mold, mildew, and insect damage.

Aesthetic features

Sleek and modern design.
Subtle texture adds a visual interest, and tactile dimension.
Its color and aesthetics remain unaltered.
Easy to clean.

Maintenance and cleaning

A soapy solution with a neutral pH can be used to remove any stains or marks. Avoid harsh chemicals or abrasive brushes that could damage the finish. Use protective covers during extended periods of non-use to shield your furniture from the elements.

Funda de cubrir
Protective cover

En POINT recomendamos proteger los muebles de exterior con medidas simples y mejorar así su durabilidad. Para ello, creamos la Protective Cover, una funda protectora especial, disponible en color beige, hecha de poliéster con lacado acrílico. Es resistente al agua y cuenta con un tratamiento fungicida en el interior. Además, es repelente a la suciedad y resistente al frío, al calor y a la intemperie.

Cada pieza cuenta con su propia funda. Además, tiene un cordón que permite ajustar la funda al mueble, alrededor de la base, para que el viento no pueda levantarla.

Para obtener mejores resultados, es conveniente que los muebles, cojines y cuadrantes estén secos antes de cubrirlos para evitar humedad y manchas de moho.

At POINT we recommend simple measures to protect outdoor furniture and make it more durable. For this purpose, we created the Protective Cover, a special protective sheet, available in beige and made from polyester with acrylic lacquer. It is waterproof and treated with a fungicide on the inside. It also repels dirt and is heat, cold and weather resistant.

Each piece comes with its own cover. It also includes a tie so you can adjust the cover to the furniture around the base to secure it against the wind.

For the best results, the furniture and cushions should be dry before they are covered in order to avoid moisture and mould stains.

LETTER OF WARRANTY

Point, S.L. gives a 3-year guarantee for all its outdoor products. This guarantee covers all damage or material defects detected during this period. POINT also provides a 5-year guarantee covering the fabrics used on the furniture.

To be effective, this guarantee must be used under the parameters of “normal use”. Damage caused by vandalism, incorrect use or carelessness are excluded. It also excludes the discolouration of teak wood, as this is a natural process of furniture made from teak. Please check the [Maintenance & Cleaning manual on our website](#).

The guarantee comes into effect the moment the buyer takes possession of the products. Damage due to inadequate storage after this moment will be the buyer’s responsibility.

Francisco Pons García
Export Manager

CARTA DE GARANTÍA

Point, S.L. ofrece una garantía de 3 años para todos sus productos de exterior. Esta garantía cubre todos los daños o defectos materiales ocasionados durante este período. POINT también ofrece una garantía de 5 años que cubre las telas utilizadas en los muebles.

Para que sea eficaz, esta garantía debe utilizarse bajo los parámetros de “uso normal”. Quedan excluidos los daños causados por actos vandálicos, uso incorrecto o descuido. También se excluye la decoloración de la madera de teca, ya que se trata de un proceso natural de los muebles hechos de teca. Para más información consulte el [manual de mantenimiento y limpieza en nuestra web](#).

La garantía entra en vigor en el momento en que el comprador toma posesión de los productos. Los daños debidos a un almacenamiento inadecuado después de este momento será responsabilidad del comprador.

Francisco Pons García
Export Manager
