UltraShield™

Composite Decking

Bringing the Beauty of the World to Your Backyard

What are you going to do
with your extra time?

Bring new life to your outdoor space.

UltraShield allows you to create a fun and relaxing place for your children and family to spend time together, without ever leaving the comfort of your backyard.

With superior scratch, fade, and stain resistance, our decking will outperform all other decks on the market.

With UltraShield, the future of decking is here today.

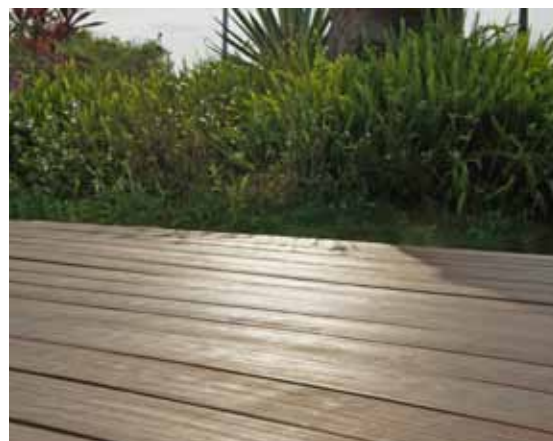

We provide the foundation for your happiness for a lifetime.

Have you ever thought about doing activities in the comfort of your own home?

Wrestling with your son on a brisk summer afternoon?

How about meditating under the stars after a long day's work?

What about bringing the wilderness to your very own backyard?

We let you get back to what life is really about, living it.

UltraShield was engineered in mind to give you **Ultra Low Maintenance.**

What is ultra low maintenance?

It is washing your deck with a mixture of soap and water on a need to basis.

Wait but there's got to be more right?

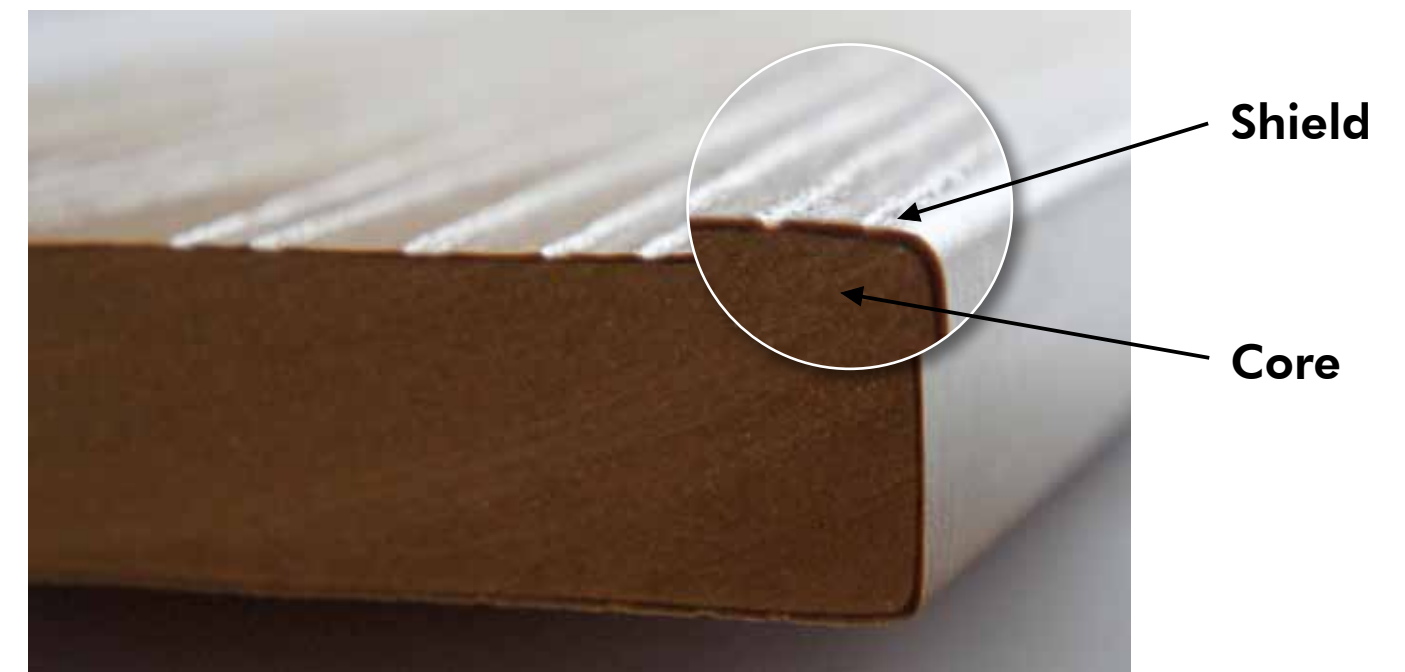

No, seriously that is all with UltraShield, there is no need for staining, painting, or sanding after your installation. We made sure that UltraShield would give you a long lasting deck that would look and perform the same year in and out.

Shield

- The shield's patented formula provides color streaking and grain that brings you the warmth and beauty of wood without the high maintenance.
- It withstands high traffic without exhibiting the signs of wear as seen in conventional composite wood.
- Our shield encases all four sides to give absolute protection from Mother Nature's harshest conditions.

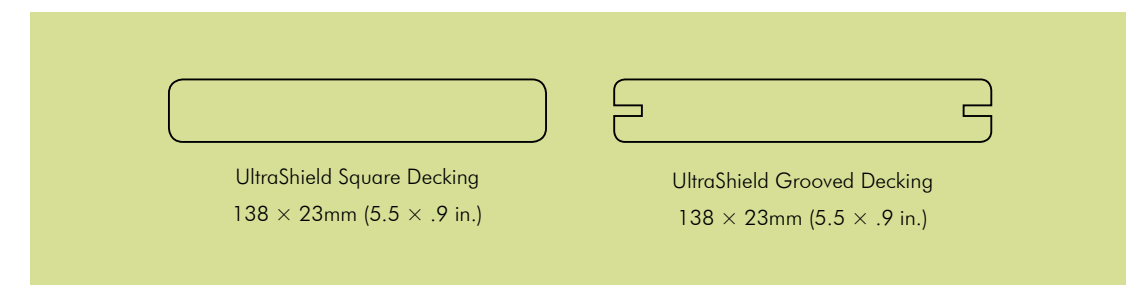

Core

- The interior layer is made from environmentally-safe material, such as recycled milk jugs, plastic bottles, and wood fiber.
- This highly dense core allows for greater strength and durability.

Decking Profile

- UltraShield decking offers both squared and grooved profiles, with the flexibility to choose between common screws and hidden fasteners.

Your colors, we have them.

UltraShield decking comes in four natural vibrant hues and tones offering a realistic wood appearance.

Sahara Sands

Brazilian Rainforest

California Redwood

Stonehenge

The colors shown above are only for reference.

Undeniable Color

Color

Our exclusive color technology brings a world of natural beauty to your backyard oasis.

UltraShield provides maximum protection against the sun's harsh UV rays so you can enjoy ultimate color intensity without worry about fading.

Pattern

The wood grain impression came together after months and months of tedious cast molding of real wood grains from different types of trees around the world. UltraShield ensures that you have the most realistic wood grain in the market.

Scratch Resistance

Your deck doesn't have a memory, but you will.

Pushing furniture across your deck to get a new look?

Moving closer on your deck to the dinner table with your metal patio chairs?

You might think twice about doing these things with the conventional composite lumber for fear of scratching your deck. UltraShield takes care of these fears because of a nanotechnology additive in shield that fully binds to the core of all four sides, to give you complete protection.

- The durable, long-lasting, highly scratch resistant surface provided by UltraShield permits carefree maintenance for years to come.
- Our decking will not splinter or crack, making it barefoot, child, and pet friendly.

Stain Resistance

Don't worry, don't rush, we allow mess.

Drinking red wine on your deck late at night, but accidentally spill it?

Don't worry you don't have to ruin the moment by getting up immediately and wiping it off your deck. That is because with UltraShield we allow stains of any kind shape or form. Your deck will never leave lingering ring stains you see common with coffee, plant pots, and red wine. So sit back relax and just enjoy the moment and let UltraShield take care of it for you.

- Our decking will never become discolored or stained. Ketchup, wine, and even grease are no match for UltraShield's stain resistant technology.

Why UltraShield?

Outdoor Decking Materials Comparison

	NewTechWood UltraShield	Conventional Composite	PVC Composite	Wood

Typical Timber Maintenance Costs

Quick indication of how much installing a timber deck is really going to cost over years, as UltraShield doesn't need ongoing preservative maintenance like timber.

Deck Size	Annual Maintenance		Savings using UltraShield	
	Maintenance Materials	Time and Labor Cost	Over 5 years	Over 10 years
20 sqm	\$100	8h=\$320	\$2100	\$4200
50 sqm	\$250	20h=\$800	\$5250	\$10500
100 sqm	\$500	40h=\$1600	\$10500	\$21000

* Amount in USD

UltraShield goes beyond just doing the common norm (i.e. stain, scratch, and fade resistance), with our product you join a lifestyle for the elite. This lifestyle is the highest form of outdoor enjoyment without leaving the comfort of your own home.

UltraShield brings science and nature together for the ultimate deck.

Here at NewTechWood,
we take pride and integrity in our products.
