Scent Marketing

About us?

Centhylon is a company dedicated to scent marketing and the production and sale of aromatic products of excellence for companies and the home.

Our fragrances are elaborated with base of essential oils using first quality essences, formulated with base of natural and noble materials.

In its manufacture, the origins of the raw materials are respected to the maximum and they are developed with processes of maximum demand.

Scent Marketing for your business.

Improve the satisfaction of your customers.

The aromas positively influence the behavior of people, since the smell is connected to the limbic system, where memories and emotions are found, creating a direct sensory connection between brands and consumers.

The smell is perceived immediately and it remains in the memory of the consumer for a long time.

Smell is the only sense that does not pass through filters, since it is processed directly in the brain, so its action is direct and immediate.

www.centhylon.com

The use of aromas is a powerful tool to create an authentic and lasting experience in the memory of the customer and a tool to revalue the products and services of the brand.

Hotels

Gyms

Clothes shops

Clinics

Offices, receptions, catering, car dealerships,
and a host of other sectors ...

www.centhylon.com

The correct choice of a distinctive aroma is essential, since it is essential to link the fragrance with the ideals that the brand aims to transmit and the objective typology of the users, thus creating an emotional bond between both of them.

When the customer has been repeatedly exposed to the fragrance of a brand, he will recognize it easily. People remember an aroma with 65% accuracy after one year.

Scent marketing represents the art of fusing a fragrance with a brand and its customers. It represents a fundamental part of the identity of a company since 75% of our emotions are affected by smell.

A scent directly influences our behavior and can remind us of memories instantly. Olfactory marketing combined with other marketing techniques will establish a lasting connection between a brand and its users.

Professional Fragrances Diffusers.

For small and large spaces.

At Centhylon we have a wide range of professional aroma diffusers. Of elegant and minimalist design, they will combine very well with any decoration. Nebucent nebulizer fragrance diffusers are ideal for aromatizing from small to large spaces in a silent, homogeneous and clean way.

A dry fragrance mist will spread effectively and continuously throughout the room, creating a pleasant and sophisticated atmosphere.

The Nebucent aroma diffusers can operate autonomously or by using air conditioning ducts.

Easy to use Daily timer to adapt to your needs.

They spread a very volatile dry mist that will expand homogeneously and continuously throughout the room.

Ideal for perfuming clothing stores, hotels, offices, gyms, clinics, homes, etc.

Fragrance diffusers Nebucent Little. Large diffusers for small spaces.

The aroma diffusers Nebucent Little allow us to perfume small spaces with the same technology used for professional frafrances diffusers for large spaces.

You can schedule several daily schedules and each day independently, as well as the intensity of the aroma. This allows us to adapt the operation of the diffuser to our schedules.

NEBUCENT30

- Plug and play
- Light-control & whole-day working version
- App control version
- 4 intensity level.

Light-control App control version whole-day working Plug and play

Dimensions: 87mm (width), 214.2mm (height), 65.4mm (base width)

Bluetooth App control

The image shows a white, vertical, plug-in fragrance diffuser. To its right is a technical drawing with dimensions. Below the diffuser are four icons representing its features: a light bulb for light-control, a Bluetooth symbol for app control, a 24-hour clock for whole-day working, and a plug for plug-and-play. To the right of the diffuser is a smartphone displaying the Nebucent app interface, with the text 'Bluetooth App control' above it.

**Diffuser fragrances
Nebucent25
Excellence for you**

The image shows a white, rectangular, plug-in fragrance diffuser next to a small bottle of Centhylon fragrance. The bottle is white with a blue label that features a centaur logo and the text 'CENTHYLON', 'FRAGRANCIA NEBUCENT25', and 'Nebucent25'. The background is a light blue gradient.

Nebucent 100 and Nebucent 200 fragrance diffusers.

The aroma diffusers Nebucent100 and Nebucent200 are the most used for the aromatization of medium and large spaces.

Their avant-garde design and low sound level make them the best solution for perfuming spaces.

Its nebulization system creates a nanoparticle mist that expands homogeneously and constantly, keeping the rooms perfumed for long periods of time.

Professional Aroma Diffusers.

Perfumes large spaces with the professional fragrance diffusers Nebucent.

The first impression is the one that matters the most, and with an appropriate aroma we will make it positive for your clients, creating a powerful link between them and your brand. Scent marketing helps your customers stay longer in the sales space and makes the shopping experience more pleasant.

Olfactory marketing represents an excellent channel of communication since a fragrance has a power of evocation greater than other sensory stimuli. It helps us to awaken memories and emotions and favors the loyalty of users with a brand.

The use of a fragrance for your business represents a marketing strategy with originality and effectiveness, overcoming other stimuli such as visual or auditory.

In Centhylon we offer you fragrances diffusers that can work autonomously or through air conditioning pipes.

www.centhylon.com

In Centhylon you can find diffusers that can cover 30m2 to 3000m2. The aroma diffusers by nebulization for air conditioning, allows us to perfume large areas such as shopping centers, restaurants, gyms and many other sectors.

Applying scent marketing in your business represents elevating it to the next level. The incorporation of an fragrance represents a sensorial experience for your clients that is very powerful and positive and this makes your brand obtain a competitive advantage with respect to the companies in your sector.

The dosing pump is installed in the ventilation systems to act as a diffuser of fragrances and perfumes. It is characterized by its ease of connection in air conditioning ducts, easy maintenance and application. It is equipped with a regulation system to control the intensity that is desired.
